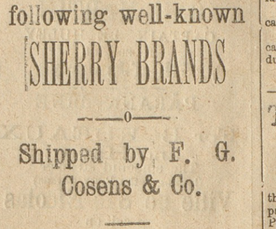
GILLARD'S
SHEEP DIP



This Dip is most carefully prepared by the latest improved methods and can be used with
COLD WATER
Supplied to the Prince of Wales's Farm at
SANDRINGHAM
TESTIMONIALS.
From Mr. JOHN J. MAHON, Capilla de Señor, June 29, 1881.—The dip which you sent me I used according to directions, and I can assure you that it gave the desired result. During four years of practical experience of curing scab in sheep, I have seen many specifics used, and I consider Gillard's the only one that gives complete satisfaction. It improves the quality and promotes the growth of the wool. For efficiency, economy and facility of application, I prefer it to any dip I have used.
From MR. JAMES M. THOMAS, Estancia Santa Ines, Monte, June 29, 1881.—Having given a good trial to Gilliard's Dip, I have much pleasure in bearing my testimony to its valuable quality as a Sheep Dip. It destroys all insect life with which sheep are infected, mixes readily in cold water, does not injure the hands, and softens all hard parts. I shall strongly recommend it whenever an opportunity offers. As regards the cheapness, it should command a good sale.
From Mr. Wm. Petty, Estancia Caro, Colonia, Sept. 20, 1881—
"I feel great pleasure in informing you that the sheep dip supplied by you to me under the name of Gillard's Sheep Dip has had surprising results on my English long-woolled rams; it has kept them entirely free from scab after only twice using it, although those rams have been constantly running in a flock of scabby sheep. I intend for the first time to give it a trial with the whole of my English breed of sheep as soon as I have them shorn, as I feel satisfied I shall with that did keep scab out of the flock."
From Messrs. Patrick Mahon, junr., Ciriaco Morales, and James Murray, Capilla del Señor, Sept. 18, 1881—
"It gives us great pleasure to inform you that, after giving a good trial to Gillard's non-poisonous sheep dip, we can pronounce it to be the best specific we have used as yet, and we are fullly determined for the future to use no other remedy."

Vasilinomania
I stood one shining morning where
Dark frowned the crags of Innisvair.
The sunlight's soft and tender ray
On grim Glenartney's summit lay;
And there, upon an ancient rock
That long had braved the tempest's shock
I saw, inscribed in brilliant green,
The curious legend VASELINE!
And on the ground lay stretched and prone,
His head upon a mossy stone,
With ragged clothes and tangled hair,
And beard unkempt, and bosom bare.
A sleeping man, of stature rare,
With brush and pail beside him there.
With much surprise and some alarm
I spoke, and shook his brawny arm.
Then yawned his hairy visage wide,
And sleeping still the man replied:
"It cured me when I dying lay;
For it I travel night and day;"
"On foot around the world I've been
To sound the praise of VASELINE!"
"From Pole to Pole, through all between,
I've spread the name of VASELINE.
"On mountains high, in forest green,
I paint the name of VASELINE."
"I'd mount the mightly vault on high,
To grave it on the azure sky;"
"To cure all ills on earth I ween,
Heaven sent in mercy, VASELINE!"

CLOSING OF CONGRESS.

Congress is at last over, and the leading features of this prolonged session are now matters of history. To us the task of reviewing its labors is doubly irksome, since to our view the chief feature of the whole session was the arrest of the editors. Others will, doubtless, attach higher importance to the Deputies voting to themselves increased salaries in the face of a heavy deficit. Viewed in any light, the session has proved a memorable one: opening with the brightest promise and closing with the largest deficit, which, we suppose, explains the general satisfaction that the place is at last shut up and the members gone back to their homes.

The Argentine Republic is a rich, growing, vital and progressive nation. It would, of course, be immensely richer had it no Congress at all. But rich as the country is, the experiment of another such Congress session as that which we now close might prove too much for it, and it rests with the Senators and Deputies themselves to judge the true feeling of the country by the fact that the closing of Congress is a matter of public congratulation, and the popularity of its members begins when they retire to their homes.

There is really no mistaking public opinion on the matter. Congress is beginning to be regarded as a necessary evil, and the statesman who will rise to the position of removing that evil (it may not be in our day) will be welcomed as the great reformer of the age and the Washinton of the period.

The Congress of 1881 lost the two first months, May and June, in discussing preliminaries, and only began the serious business in August. The Chilian treaty will make the session memorable: one must acknowledge that less time was lost over it than about the Corrientes intervention two years before. The ratification of the treaty meant the economy of some millions of patacons and perhaps of thousands of human lives. It seems strange, but one really doubts whether the men in Congress are half aware of the fact. There was never a better treaty made, and never so little satisfaction evidenced as at its settlement. Both on the Pacific and on the Atlantic the treaty was received in the most indifferent manner—the most eloquent proof of its impartial nature and of the diplomatic ability that managed to arrive at a mutual 'entente' between bothpeoples. The encomium of the treaty and of its authors was left to the foreign public and more especially to the commercial community, the members of which made New Year's gifts to the President, to General Osborne and Dr. Irigoyen.

The consolidation of the debt to the Provincial Bank occupied many sittings and terminated in the approval of the bill. Like all bills of a financial nature, it brought questions to the front and opinions to back them that shewed how all erred in their estimates of the vitality of the country; in fact the country was ahead of the Legislators. Few thought that the premium on the patacon would fall unless both Governments paid up what they owed in the Bank; matters have turned out otherwise; the paper dollar is at par, borne up by the vitality and increased productions of the country. No doubt, the 'Oficina de Cambios' must be reopened on the basis of these payments by both Governments. The law passed, but the Executive reserves to itself the right of promulgating same when opportune.

The law of 8,000,000 $f., to complete the City Improvement Works was sanctioned at a late hour, and this bill only shews how very improvident Argentine or rather Buenos Ayrean Governments have been. Anybody would have thought that after the severe lesson of 1871 these City Improvement Works would have been pushed ahead with feverish activity, in order to avoid a repetition of the terrible catastrophe; but such has not been the case, and we have seen the Provincial Government of Buenos Aires vote hundreds of millions of dollars to fan the blaze of civil war and leave the health of the city in the hands of fate. At present the intentions are serious and the completion of the works is not remote.

Amongst other important bills sanctioned by the late Congress, the federalization of Misiones figures prominently. This most fertile territory, claimed by Corrientes, gave rise to the longest debates in Congress; it was a contest between narrow-minded local prejudices and national interests. The territory is national and it remains to be seen if the law in question will only be a dead letter or the prelude to some vigorous impulse to colonization up there. So much has been said and discussed about emigration so many agents have been sent to Europe for the purpose, and so many exploded emigration schemes have cropped up during the last six years, that it is useless to dwell on the topic. The Italians always come and probably will continue doing so, and they are the coming race in this Republic; there is no better or more thrifty emigrant for these climes.

The Consolidation Bill, amalgamating all the loans at 5 per cent at a cost of 60,000,000 more patacons to the country was duly shelved. The melancholy features of the bill frightened the Deputies, and its indefinite postponement augurs the well-deserved fate of the scheme. Should this bill ever come before Congress, its discussion alone will take up six months, but hopes are entertained that by next May the bill will be forgotten or thrown into the waste paper basket of the Finance Minister as a desultory attempt to honorably fleece bondholders.

The Woodgate Docks' Bill has been postponed, but its discussion next session promises to be favorable. If Argentines want a port, let them sanction, the bill. It is useless to refer to the Budget; a deficit of over 4,000,000 $f. has been legally sanctioned and the Government will be in the necessity of barrowing more money to pay its expenses: the probable returns of 1882 will be something over 24,000,000 $f.; the Government can expect little from the National Railways, at the utmost some 500,000 $f; as regards the Post Office it may this year pay its expenses, but one may doubt it; the telegraphs are an essentially Government machine and the revenue of same is nominal. The increased dues and valuations will add something more than a million of patacons to the Custom House returns at the expense of importers, but on the whole one may safely calculate a total Government revenue of 24,000,000 $f. If Congress had not been in such haste, this budget would never have been declared law, and as is the case with all matters hastily carried out, the law is deficient.

The Senators and Deputies withdraw to their homes with intense satisfaction no doubt, but the impartial public deplores the issue of the last sittings, at the same time that it applauds the great abnegation of the honourable gentlemen in attending to the interests of the country during eight long months.

They depart, but will all come back with their families to visit the Exhibition and hear the opera at Colon. Buenos Aires has always a most salutary effect on the Provincianos: they always cherish the hopes of blessing the Interior provinces with the same civilizing influences of the capital. In general the reform is for the better, when it shunts into rails and steam engines, bridges and granaries, but it also finds an outlet in high heeled boots, silks and cottons: the increase of the cotton trade in England is due to the large consumption of that material in the Interior provinces of the Republic. The Deputies will see also to the extension of the railways and facilities of communication with Bolivia and Chile. The Interior at present is advancing with gigantic strides, thanks to wheat, sugar and the provinciano element in Congress and the Executive, and may their speedy return be the forerunner of still more progressive elements in the provinces.

DR. STIRLING.

Last week the Right Rev. Dr. Stirling, Bishop of the Falkland Islands, left for Montevideo, after a busy six months' sojourn in the Plate. During his stay here he was continually occupied with the missionary labours connected with his diocese, as will be seen by the following memorandum of his visit:—

The Right Rev. Dr. Stirling, Bishop of the Falkland Islands, landed in Montevideo the second week in July. After holding a confirmation in the English Church, he reached Buenos Aires on Friday morning, July 22nd. The next day a confirmation was held in St. John's, Buenos Aires, and 43 candidates were presented by Dr. Smith and the Rev. T. H. Gybbon, Spilsbury conjointly.

or any other ingredient beyond Milk and Sugar. DELICIOUS FLAVOUR. Directions as simple as A B C. TRY IT.

The following week he began his visitation of the camps, successively going over the districts round Negrete Estancia and Rosas. Returning to town on the 5th of August, he next visited the suburb of San Jose de Flores. After various interviews with the trustees of the chapel in this suburb, it was at last determined to erect it into a separate chaplaincy.

On the 10th of August the Bishop left town for the western camps and remained for several days. Returning to town on the 15th, he left again for the Gran Chaco colonies on the 16th. He remained in those districts until the following October and made a thorough examination of the various colonies.

At a confirmation held in St. Andrew's Church, Alexandra Colony, on September 10th, 12 Italians were confirmed and 4 English. He also paid two visits to the Reconquista, the frontier settlement to the north, with a view to study the possibility of founding a mission among the Toba Indians. A plan was here suggested to him of founding a commercial settlement, with a grant of land from the National Government, and placing it under a missionary, after the plan of the Moravian Missions.

After leaving the Alexandra Colony the Bishop visited successively Paraua, Rosario, the Cañada de Gomez camps, Cordoba and the Fraile Muerto camps, returning to Buenos Aires on December 3rd.

He next paid a visit to Salto, where he reviewed the work of the Rev. W. Shimield, and was particularly struck with the success of Mr. Bowring's mission among the Spanish-speaking inhabitants.

Returning to Buenos Aires he preached on Christmas Day in the restored chapel at Flores, and finally licensed the Rev. Gybbon Spilsbury a chaplain of this increasing suburb.

He left Buenos Aires for Montevideo on the 4th of January, en route for the Falkland Islands.

All who had the pleasure of making Dr. Stirling's acquaintance regret his departure, and hope that he will have a pleasant voyage to the Falklands and soon return to the Plate, where he has such a wide circle of friends of every denomination.

The Plato's Mails.

London, December 10th.

Once more there is uncertainty as to whether the financial agreement with Turkey will, after all, be carried out. When the final draft of the proposed decree was read at the last meeting of the Commission Mr. Bourke declared he accepted it subject to the approval of the bondholders. To this several delegates objected on the ground it weakened the authority of an arrangement which must receive the Imperial sanction. After communicating with London Mr. Bourke modified his statement to the extent of promising to recommend the acceptance of the decree. But this is also declared unsatisfactory, and fears are expressed that the arrangement may yet fall through.

Five hours were required for the ceremony of canonisation at Rome yesterday. The people began to gather so early as six o'clock in the morning; but there was throughout neither unusual excitement nor disturbance. In the hall itself the heat was so great that several ecclesiastics fainted; while Pope Leo's voice was feeble, and his remarks were not well heard. He confined himself to eulogising the earthly work of the persons who had just been canonised. There were no startling political allusions.

Three gaps in the ranks of the French Academy were filled up yesterday — those caused by the deaths of MM. Duvergier de Hauranne, Littré, and Dufaure. The successful aspirants for the honours of the 'immortals' were Mr. Sully-Prudhomme, a poet of some merit, Mr. Pasteur, an eminent scientist, and M. Cherbuliez, a writer of fair position in France.

There is no sign of peace yet between the Centre party and Prince Bismarck. The followers of Dr. Windthorst are still sulking from semi-official print remarks that 'American swindlers' have evidently expressed so strongly their sympathy with 'swindlers in Russia,' that the President has been forced to interfere in foreign matters which he does not understand.

Even a semi-official paper may sometimes commit a mistake—as in Belgrade, where one whole impression of the *Videlo* has been condemned for containing an article unfavourable to Russia.

Mr. Bright laid the foundation stone of a new Board school at Llandudno yesterday. He spoke very briefly, excusing himself as being unable to say much in the open air. In the evening he addressed a meeting at some length, referring to the subject of education, and touching on the condition of Ireland.

Speaking at Burton-on-Trent, last night, Mr G O Trevelyan devoted himself to explaining what the Liberal Government had been doing in strengthening the fighting services. He complimented Mr W H Smith on his excellent administration of the Navy, and stated that the present Government had added, and were still adding, largely to the number of armour-plated ships. At the present moment, he declared, there was no better armed fleet than ours. So it was also with the army. Faults discovered during the Zulu war had been remedied; and in any future war the regiments ordered to the front will be ready to march at twenty-four hours' notice, without borrowing a man from anywhere.

Dealings in public securities yesterday were not very numerous. Consols rose ⅛ per cent., and some of the British railway stocks, including Sheffield 'A' and South-Eastern 'A,' were better, but Brighton 'A' declined. American lines exhibited firmness, while Canadian receded. The principal movement in foreign bonds was a fall of ½ to 1½ per cent. in Russian. There were no bullion operations at the Bank.

Yesterday afternoon, a deputation introduced by Mr George Dixon, of Birmingham, and representing the School Boards of London, Birmingham, Bristol, Blackburn, Rochdale, and other towns, had an interview with Earl Spencer and Mr Mundella with reference to the new Education Code, and presented a memorial setting forth certain modifications they desired to see introduced. Earl Spencer, in reply, said he wished to counteract the difficulties and obstacles which had been formed in working the old code, and that was the sole object his department had in view. They only wished to work out a basis for the new code, and not to alter it until absolutely necessary. Mr Mundella also replied, promising that the views submitted should be carefully considered.

The Lord Mayor of London has issued an appeal in aid of the Mansion House Fund for the Defence of Property in Ireland, which will be formed early next week. His lordship says the movement will be free from all political bias, and hopes such a fund will be raised as will give effective assistance to the loyal people of Ireland in this emergency.

Yesterday was almost the first wintery day experienced this season. The air was frosty, and thin ice formed in the early morning. A thick fog settled over the river in the afternoon, considerably interfering with the traffic.

Fifteen persons were injured by a collision between trains from Chester and Glazebrook, which took place a few hundred yards outside the Manchester Central Station, between six and seven o'clock last evening.

Negotiations are in progress between the employers and the men on strike in the Staffordshire potteries, which, it is believed, will lead to a settlement of the dispute.

A railway collision occurred yesterday between Porton and Edinburgh, by which two persons were seriously hurt and several others slightly injured.

The French Chamber of Deputies yesterday adopted, by 401 votes to 81, the commercial treaty concluded with Italy.

The Festival of St. George was celebrated at Gatchina on Thursday by a grand reception and a banquet to the chevaliers of the order. In the course of the day the Emperor Alexander telegraphed his congratulations on the occasion to the Emperor William, as the oldest and most celebrated knight of the order.

In the Italian Chamber of Deputies, yesterday, Signor Mancini, Minister for Foreign Affairs, said Prince Bismark had conveyed to him by telegraph his thanks for the interpretation which he had placed on the Imperial Chancellor's recent remarks in the Reichstag, in reference to Italy.

Six-six miners have been killed by an explosion of fire damp at the Cockerell Colliery, Belgium.

It is announced from Constantinople that the National Assembly of Armenia, complying with numerous petitions, has sent a deputation to Patriarch Narses, to induce him to withdraw his resignation. Should he persist in his resignation it is expected that the Armenians will re-elect him as patriarch.

EDITOR'S TABLE.

The Plato, of the Lamport and Holt line, brings full details of the burning of the theatre at Vienna. It is an appalling lesson, and people want to know once for all if the Municipality of Buenos Aires mean to take it to heart and act on it? The Colon Theatre is now closed, and the alterations imperatively demanded to allow the public even a chance of escape in case of fire or panic should be commenced without an hour's delay. But how can the public hope for this when the city authorities allow the new theatre in Calle Florida to be run up with only one exit on Calle Florida, and with most of the other defects that cause hecatombs of victims in case of accident? Every man who read yesterday the harrowing accounts from Vienna made the same remark—"we'll have a similar horror at Colon, some night, as sure as Fate, if the Municipality does not do something." See Supplement.

The races at Palermo on Sunday were better (barring the steeple chase) and better attended than those on Friday. The winners were Creosote, Drone, Eureka, Puran and Azrael, the latter scoring another great triumph for the breeding stud of our friend and countryman, Mr. Kemmis, of Las Rosas.

Commander Brown, of the Argentine Navy, grandson of the great Irish Admiral, died last week in Florida, B.O. The remains will be brought here for interment.

The Fire Fiend is rampant in both Hemispheres. On the heels of the Vienna catastrophe comes an awful blaze in Antofagasta, Bolivia —300,000 patacons worth destroyed: nobody hurt. Another terrible fire took place in Lima.

There was not much news afloat yesterday. In Montevideo there is a rumpus between the Rural Association and the Industrial League, all about the B.A. Exhibition, the first named body having patriotically refused to take the trouble of classifying the exhibits.

There was quite an Exodus of Congressmen on Sunday and yesterday. The early trains from the Central were crammed with legislative wisdom. It wont be long till we see the prodigal fathers of their country again. The prodigal son was nothing to them in the way of disposing of cash.

The sons of Irishmen continue to press to the front in the camp. We cut the following from the last issue of our esteemed contemporary the *Southern Cross*:—The Jueces de Paz for the current year have been named, and we are much pleased to notice the following gentlemen on the list: James Murphy, Las Heras; Hubert Rorke, Baradero; Michael A. Duffy, Carmen de Areco; John Garrahan, Rodriguez. Mr. John J. Murphy has been appointed Municipal of Marcos Paz; Mr. Edward Murphy, Comandante of Saladillo; Mr. Wm. Casey, Comandante of Las Heras; Messrs. Matthew Kelly and Thomas Dillon, Municipales of Suipacha. The opposition papers are extremely wroth about some of these appointments, but their chief reason is that the new incumbents happen to differ from them in politics.

It is time for the National Government to pull up the Provincial Governments in the taxation line. Entre Rios has long been a notorious breaker of the Constitution by imposing export taxes on cattle, hides etc, and now Rioja has put a heavy import duty on wine and spirits from other provinces. A tax on talk in all our Legislatures (National included) would produce an enormous revenue.

The Florida Garden proprietors are getting up a ballet corps, under the direction of Signor Garbagnati. The danseuses are of the Colon Company and will make their debut tomorrow night in 'Amor y Venus.' It is safe to predict that the Garden wont hold all the High Life that will be anxious to get into it to-morrow evening.

We received yesterday a sad telegram from Goya, announcing the death of Mr Peter Newkirk, brother of Dr Newkirk of that place, with whom we sympathise deeply on this family bereavement.

On Sunday all the suburbs were crowded. It was a glorious day, and the turn out at the Tigre and S. Fernando astonished even the boatmen. All the quintas down there are now filled with the families from town, and every quinta is a family circle. San Isidro looks this year more charming than ever, and Vignolles's hotel offers better and cheaper accommodation than any other hotel in the country; the tables are spread under the vines and amidst the roses, and we recommend the place to families about to run out of town for a month or so.

Yesterday, thanks to the kind attention of Capt Le Gallais, commander of the 'Grecian,' we received several interesting pamphlets about Kansas and Canadian emigration. These little books give the most wondrous facts about the Western camps, and we want sadly some such publications about the Plate.

There is a general desire that the Municipality should summarily suppress the masquerade balls. By all accounts there are far more flying bottles, plates and glasses, than 'flying feet' at these delectable entertainments.

The return match between the B.A. and Lomas C.C.s was played at Lomas on Friday last. The day was everything to be desired, a mild fresh breeze blowing, and the attendance of many ladies added considerably to the enjoyment, though the scoring, probably on that account, was very small on both sides, B.A. C.C. winning by 7 runs. We hold the score for to-morrow; no space to-day.

The Western Railway is thinking of running an 11 p.m. train from town and Moron on Sundays and holidays. It is about time. The suburban service of trains on our railways is laughably primitive for a city that aspires to rival Europe in so many ways. No man residing in any suburb more distant than Flores can now dine in town when there is cold mutton for dinner at home, unless he elects to sleep in the city also, which is most inconvenient.

We rejoice to learn that Mr. Casares, the esteemed President of the Provincial Bank, is pronounced out of danger by his physicians.

Although it is more than three weeks since the Municipality ordered the water of the Riachuelo to be analysed, yet the City Analyst has not told the public whether tea, negus, or punch can be safely made with the fluid.

One of the best signs for the country is the continued purchases of estancia land by the Dentists. Somebody has said it, that in the present age the men of the best and soundest judgment are the Dentists. Their profession, we suppose, gives them priorities over other mortals. One of the richest and most successful men in Paris was an American dentist, and here in the Plate everything the American dentists touched in the way of land has turned to gold. The great wonder is that a Dentist did not buy San Blas at the 'concurso' auction.

The appetite for land in the Interior is not quite so ravenous as it was. At the auction of Government lands in Cordoba the other day a good song was the average price, and, as the Cordovese have wretched voices, the sum realised was very small.

A colleague announces that there is a move amongst estancieros to appeal to the Supreme Court to quash the recently-enacted Cattle Branding Law, which imposes such a heavy tax without any corresponding benefit. At Mercedes, Chivilcoy and Bragado the estancieros are already moving in the matter, and the entire province should take it up. It is about time for the whole country to make a push to curb the taxing propensities of Provincial Governors and Legislators.

A Chaco Cacique named Mbendizbi, died up there lately of old age. The old fellow lived in Formosa since its foundation, and considered himself Governor of the place.

National Bank Shares	126½

The business of the Bolsa to-day was limited to Cedulas; very little done in National Bank Shares and nothing at all in gold. It is a long time since we remarked so many Series bought on the market; after a prolonged interval of absence Series B made its appearance and some 12,000 pats were sold at 99½ to 99⅝. Series A sold freely for end of month at 1 o/o premium, ⅛ o/o premium for cash. We remarked many more buyers than sellers. In Series E some few were sold at 87½; its onward march has been slightly detained, and operations therein are very small. The Bolsa evidently shews a revival in Cedulas, and no wonder; with the exception of the National Bank Share there is no other stock than the Cedula to operate in. The gold business has disappeared; most of the National stocks are floating in the London market; there remain Cedulas, National Bank Shares, and Gas Shares. The Cedula at present cannot be considered a speculating stock, and the gaze of the market will be turned in another direction before long. In spite of the many sales in Cedulas to-day the total business during official hours only amounted to a little over 100,000 pats.

There is a pause in National Bank Shares, and the calm state of the market struck every one. The shares fluctuated slightly, opening at 127 and closing at 126⅝. The business done was small, and very little inclination to buy or sell was evidenced at the ring; a 'gato' at the close of the official hours stirred up the brokers slightly. Some 750 shares were sold for the end of the month; nothing was done cash. The heavy holders kept aloof to-day, and the transactions were consequently insignificant. It is said that already some 5,000 shares have been sold 'desconbiertas' since the beginning of the month.

Some Primitive Gas Shares were sold to-day at 1,800; the total business only amounted to 55 shares; the price shows a heavy rise.

Exchange is slightly weaker, 60d to 60⅛d, but few takers and little doing:—

Mr E. Casey sold in the Once to-day 1000 arrobes of washed wool at reserved rates, supposed to be between 160 and 170 m/c per arroba.

This morning one of Mr Schwartz's large boilers was put up in the Continental Exhibition; another is to follow soon: thanks to the strong rails in our streets the tramway trucks were able to transport the immense engine early this morning. These two boilers will set all the machinery of the Exhibition going. Messrs Schwartz will also exhibit an immense wheel own, which will compete with the imported ones.

Messrs Schwartz have bought a square of land, 30 yards off the Calle Goya, near the site of the proposed Southern Railway work shops, for the round amount of 240,000 m/c. This is a great bargain.

The property in the Calle Andes, 35 by 80 yards, alongside the quinta of Lorenzo Torres, put up for sale at the upset price of 140,000 m/c, fetched the very high amount of 402,000 m/c. The whole Bolsa was talking of the sale.

In Primitive Gas Shares circles hopes are entertained that at last the long-standing debt of the Municipality will be settled this year. This impression has produced a great improvement in the rates, and answers for the rise in some.

We were favoured to-day with the following important telegram—

"London 7th

"Treasury Bills nominal, prices falling."

There are 6 cargoes of Entre Rios salted, some 60,000 offering at 49 rls; we hear of former cargoes from the rivers, making a total of 200,000 hides.

Our correspondent in London informs us that the Jackson wool has been sold in England at the rate of 12½d; this is 1½d below the average of the best Australian.

Freights are very active and engagements large.

Many brokers were welcomed on Change on their return from Montevideo, where they sped away their leisure hours during last week at the Pocitos. There is a general impression that Montevideo is on the mend. Lots of new houses are springing up, and there is quite an atmosphere of prosperity and fashion about the Mount. The attention of our esteemed Captain of the Port is drawn to the splendid arrangements at Montevideo, where the passenger is protected from the onslaught of the 'changadores;' the same rules might be enforced here.

At afterhours little or nothing was done in Nat. Bank Shares: the market closed, buyers at 126⅜. Some 1500 Cedulas Series E. were sold at 88. Several small lots of gold were purchased at 25.03 and 25.04.

Although banks in general during the last week have been more liberal than in the last fortnight of December, and discounts rule easy; applications to the Provincial Bank have indeed been insignificant. In the first week of the month the Bank did not discount over 4,000,000 m/c, owing to this scarcity of applicants. Rates in the market are unchanged, and money in general is easy; now and then, owing to special specie payments, gold is in demand, but payments are beginning to become indiscriminate, whether payable in gold or paper.

Messrs Recca & Co. have sold their total faena of ash and bones at 22 pats. This is the second transaction of the kind in this season. The Deniz saladero made the same operation at a slightly lower rate.

The Indian is more enterprising than is generally believed; a Chaco Cacique has opened, hachet in hand, a road through the Chaco over 100 leagues long by a width of 10 yards. This road runs from the Province of Santiago del Estero to the Paraana in front of Corrientes. The Cacique in question possesses two estancias alongside the aerolite, Dr Kavanagh of Carlow mentions it in his works on Comets. The Government should grant the petition of the Cacique; he asks for free land grants or otherwise rations of tobacco and fresh meat. If all the Caciqut's Indians are like himself, they will be the very best colonists; such enterprise beats the Italian hollow.

The Eastbourne, in Montevideo, has on board a cargo of railway material sent by Mr Alejandro Paz from Europe. These cargoes of railway materials are succeeding each other very rapidly, shewing that the National Commissioner has not been idle in Europe. The value of the materials that have already arrived is stated to be very large.

The Rosetti, advertised to sail days ago, is still in port. These delays are remarkable; punctuality in this case does not mean much, but we remark that delays in the harbor during the month of December have been the order of the day, and still continue to be so all over the line.

It is calculated that already one-third of the wool clip has arrived in the Plazas since the beginning of the season. This time last year our deposits, as was usual at the time, were all full, but strange to say to-day there are not 10,000 arrobas in deposit; all the wools have been sold as fast as they came in. This total clearance of the stock was not anticipated at the beginning of the season when the warning telegrams from Havre and Antwerp frightened the estancieros and the consignatarios. Since then there has been a complete revival in the European markets, and the yield of the new wools has been pronounced excellent. Ano her important feature is that River Plate wools are improving every year. The wools of this season, more especially the 'pastoriertes' kinds, are exceptionally good; they are very light and just the thing for the manufacturer. As we stated once before, the total yield of the clip is estimated at 220,000 bales; the animals have greatly increased during 1881, but owing to the light quality of the wool the number of bales does not afford a reliable comparison with the former season. For 1882 we may expect an immense increase, owing to the new camps, the new estancias, &c., that are spreading in all directions. The increase in cattle especially is expected to be very large; overstocked camps should be a thing of the past now.

The sales of novillos are now few and far between. The animals are anything but fat, and the saladeristas are unwilling to continue the faena with such animals. A month on the Colorado would fatten all the novillos in this Province. There are some few fat novillos but they are all slaughtered for consumption here in town.

The following comparative table of export of wool of the last and present season will be interesting; this time last year there were over one million of arrobes of wool in deposit, whilst now there is scarcely any:—

Export of wools from Oct. 1st 1880 to 31st Dec., 1881, of the last two years—

	1880 Bales.	1881 Bales.
France	15,099	30,018
Belgium	10,717	25,735
England	30	645
Italy	2,054	2,919
Germany	1,461	5,780
Spain	1	76
U. States	262	222
	29,633	66,395

Nearly all the above bales have been moved off during December; we take the figures from the *Nacion*; we calculated the export to amount close to 90,000 bales. During the month of December alone close on 60,000 bales of wool were exported, and calculating 30,000 more bales for November and October we made out our estimates. The export during the present month promises to be very heavy, and in view of the present activity we may expect dull times in March and April, and the following months

In our next issue we will publish the law on the MortgageBank promulgated by the Provincial Government; the 1st Article of the original project has been changed, as our readers know.

The new pavement of the Calle Rivadavia near the Exhibition has completely changed the aspect of that street; but for the miserable buildings all along, it would be the finest thoroughfare in the Republic. The granite is laid down well, but the intervening space between the stones might be considered too large to be lasting. The Lord Mayor has taken the pavement of the city in hand, and the arrivals of 'adoquines' in the Riachuelo are large. A gentleman has offered 500,000 of them for sale to the Municipality at the rate of 18 reals each; we may well say, with Mr. Lamas, that the dust on our roads is gold dust.

The letter of Benjamin Vicuña Mackenna, of Chili, to the President of the Industrial Club is a most refreshing note. On the 4th of February the Chilian exhibits will be sent by steamer. Mackenna is the soul of the Chilian Committee, and Chili promises to figure well at the Plaza Once. The workmen at the Exhibition will have to work day and night, if everything is to be finished on the 15th of Feb. and even so, as is the case with all exhibitions a great many more things will have to be done than expected. There will be a terrific squeeze to get in all the exhibits promised. The Provinces of the Interior have sent their boxes down to Rosario, where they will remain another week before they come down.

Captain Le Gallais, of the Allan steamer Grecian, was welcomed on 'Change: his steamer made the voyage out in 21 days and a few hours.

The report of the Nineteenth Annual Meeting of the River Plate Bank is one of the most favorable since the establishment of the Bank.

The National Government has signed a contract for the construction of a telegraph line to Misiones. The wires will be drawn over palm posts from Monte Caseros in the Province of Corrientes through Paso de los Libres, Yapeyu, Alvear, Santo Tome, Garruchos, San Xavier, to the Salto Grande of the Uruguay. This line will be an extensive and important one. The Government pays the contractors 130 pats per kilometer, and the works must be begun next April.

The soundings undertaken in Ensenada show that the Admiral Brown cannot enter that harbour, unless the channel is dredged 10 feet deeper. The channel, that must be dredged measures two miles.

The Province of La Rioja, it appears, is adopting a system of 'octroi;' all wines not produced in the province are now being taxed at the rate of 2 pats per barrel and 20 cents per doz n of bottles.

Argentine estancia lands for ever. We received by the mail the statutes and bye laws of a Belgian Joint Stock Co., started with two millions francs, to work a joint stock estancia on the Venado Tuerto lands. We hold for our next the full particulars of this important enterprize.

The Minister of Haciends, Dr Romero, has authorized us to state that it is not necessary to send bills of exchange to the Stamp Office, as the stamps can be affixed at the banks and merchan's' offices where the drawers of the bills can themselves cancel or deface the stamps.

Several parties have arrived in from the Media Luna camps, they give the most glowing description of those fine lands, which are now being stocked by English and American proprietors.

It is reported that the Sampayo saladero in Guategay has begun working.

The Allan Line steamer Grecian engaged the following cargo in Montevidéo—
14,000 salted hides at 30s and 10 p. cent.
250 pipes tallow at 40s and 10 p. cent.
1,200 bales at 30s and 10 p. cent.

We take the following from Mr G Buela's important circular in Montevideo:—As is usual at the end of the year all import business has been at a stand-still: prices have fallen in some articles, owing to the heavy arrivals. The saladeros are actively working and some important sales of wool have been effected. A little more activity is expected next fortnight.

The Montevidean Custom House gave during the month of December over 450,000 $f.

The Montevidean papers of the 7th inst report the following large sales of wool—
15,000 ar. mestiza at 38½0
24,000 ar. do from a barraca at reserved rates.
20,000 ar Paysandu wool at reserved rates,
2,000 ar. fine mestiza of Mr Balza, at reserved price, supposed to be 44 per ara in barraca.

About 200,000$ deuda amortizable were sold on the Montevidean Bolsa last Saturday at from 17⅞ to 18⅛; some few Consolidados were done at 30½.

The following is the report of the London and River Plate Bank Limited, which we received by the mail:—

In presenting the Nineteenth Annual Report, the Directors congratulate the Proprietors upon the continued success of the Bank during the past year, and have pleasure in expressing their confidence in its position.

Trade in the River Plate continues on sound basis, and this year the markets show improvement for the staple productions of the country.

The Accounts now placed before the Shareholders will show that, after amply providing for bad and doubtful debts, adding £25,000 to the Reserve Fund, thus raising it to £175,000, and further reducing the cost of the Bank's Premises abroad by writing off the sum of £3,682 12s. 6d., the Directors are enabled to declare a Dividend of 4 per cent., and a bonus of 2 per cent., for the half-year ended 30th September, 1881, being, with the Interim Dividend paid in June, 10 per cent. for the year. A balance of £3,352 4s. 3d. will be carried forward to the Profit and Loss Account for the current year.

The Directors who retire by rotation on this occasion are Messrs Joaquin de Minchs, Edward Zimmermann, and John Ellin, who, being eligible, offer themselves for re-election.

Dividend Warrants, free of Income Tax, will be issued, payable on the 20th December, 1881.

ENGLISH SPOKEN

TERRIBLE DISASTER AT VIENNA.

500 PEOPLE BURNT AND TRAMPLED TO DEATH.

Vienna, Dec. 9th.

The celebrated Ring Theatre, where Sarah Bernhardt gave a series of performances a few weeks ago, has been the scene of a terrible calamity to-night. About 7 o'clock, when the performance of Offenbach's Les Contes d'Hoffmann was about to commence, before a crowded audience, fire suddenly broke out, and a terrible panic ensued. In all probability the real cause of this calamity will never be discovered, for there is but the slightest chance that those who were near the place where the actual outbreak occurred have escaped to tell the tale.

It is estimated that there were upwards of two thousand persons in the building at the time. At the cry of 'Fire!' the whole audience rose to its feet and made a rush for the doors. In the passages, on the stone staircases, and at the principal entrance in the Ring Strasse, there were scenes of frantic terror that defy description. The shouts of those who were trying to escape mingled with the shrieks and groans of the dying; the women and weaker persons swooned and were crushed to death as they were carried along by the stream, while others were thrown to the ground and trampled to death.

The calamity was so sudden and unexpected that the Vienna Fire Brigade could not reach the spot in time to check the danger, and the worst is feared.

The Ring Theatre, the scene of the disaster, is a comparatively new building, having only been opened about seven years. It was an exceedingly handsome structure, quite in keeping with the splendid edifices which have risen up within the past few years upon the broad belt of ground formerly occupied by the walls of the old city.

Probably, in the whole history of calamities by the outbreak of fire in theatres, there is none which exceeds this in horror and fatality. The flames first showed themselves on the stage. It is now believed that they originated in an engine which was kept below the stage in order to produce the electric light employed in the performance. As soon as the fire was seen a slight explosion of gas took place, and all the lights in the building instantly went out, plunging the audience into total darkness.

At this moment there were about two hundred people on the stage and in the adjoining dressing-rooms including, besides the workmen, the professional singers and numerous ballet girls, who were engaged in dressing in preparation for the performance. They had mostly only half finished their toilettes, and on the extinction of the lights every one rushed to the stage door. As there was only one entrance to the stage, there was a fatal crush in which many of the half-dressed girls fell and were trampled upon. Most of them, however, reached the street without serious injury.

In the auditorium the pit was already half full. The boxes were still unoccupied, the galleries were completely thronged. From a gentleman who was in the pit I learn that when the gas went out the audience had no suspicion that anything serious was going to happen. But in a minute or two the flames burst through the curtain, and fearful shrieks at once filled the house. Every one rushed for the passages and doors, and many were tempted to leap from the windows.

For ten long minutes there was no help from outside. In the rush to the doors scores of persons were thrown down and trampled to death. Though in the interior of the theatre the flames were spreading rapidly, there was not a ray of light in the passage along which the occupants of the galleries had to pass, and the panic-stricken crowd could not find the way out, but crushed and trampled one another to death in total darkness.

When at length the 'Turner' Brigade arrived with torches and life-saving apparatus, ladders, cloths, and ropes, about fifty persons, one after the other, jumped from the first-floor windows. They were all caught, and escaped without injury.

After that all was silent inside the theatre except the roaring of the flames that were now rapidly spreading over the entire building. Up to the present moment it is unknown how many persons have been suffocated and trampled to death, but the Fire Brigade are bringing the corpses out by dozens.

At half-past eight the whole of the stage and pit was on fire. The flames are bursting through the window and lighting up the Borsen Ring almost with the brightness of day. The population is gathering from all quarters of the city to the neighbourhood of the conflagration.

Eleven o'clock

Up to the present time eighty dead bodies have been taken to the nearest police-station.

There are several hundread corpses still in the burning building. They can probably never be recovered, as the theatre is now completely wrapped in flames. It is believed that all the persons who were in the gallery have perished.

Midnight

Until now three hundred dead have been recovered. There are at least two hundred more still in the house. The scene is most ghastly and terrible.

The following details are culled from the special reports which appear in our morning contemporaries. There appears to be great difference of opinion as to the precise mode in which the fire first appeared. One account says—While the orchestra was playing the overture, the curtain suddenly was driven from the stage side by the force of something like an explosion, and fell into the body of the theatre. A dense volume of smoke followed, and then great tongues of fire caught hold on the galleries, which were speedily in flame. Another says:—the fire was caused by the bursting of a gaspipe. In a moment the stage was in flames. The big crown chandelier fell. The confusion which ensued was appalling, the terror being, if possible, increased by the fact that the gas suddenly went out, whether in consequence of the pipes being ruptured by the explosion or by design is not known. The theatre was now lighted only by the lurid flames of the burning woodwork—many of the people, blinded and suffocated, could not effect their escape, and soon the whole interior was in a blaze. During the temporary darkness the audience struggled to reach the doors of the house, constructed after a bad plan, with but few exits. Many persons fell, and hundreds trampled on their bodies. The cries of mothers for their children and of the children themselves were frightful. Many persons sprang out of the windows of the second floor. Pumps, hydrants, and steam fire-engines were powerless. The theatre was burning for hours, and the Ringstrasse was packed with an excited and countless mass of people watching the conflagration. The spectacle was one of fearful grandeur. The scene in the immediate vicinity was distressing to the last degree. The removal of the dead and dying, the crowd of inquirera pressing in frantic anxiety to learn the fate of friends known to be in the building, wholly apart from the fire itself, combined to form a spectacle of the most agonising kind. Every few minutes discovers fresh victims, and it must be long before the 'debris' can be cleared so as to render an exact account possible. Apparently a large proportion of those in the upper part of the theatre have perished, most of the theatrical company have been saved, several being carried out of the flames half-dressed, and more dead than alive. All efforts to check the flames were unavailing, and nothing but the outer shell of the building was left standing. Considerable alarm was at one time felt for the safety of the Bourse and the Hotel de France, which are close to the building, but neither has been touched.

It was only this morning that any real insight into the horrible extent of the calamity was possible, and there can be no doubt that it will be regarded as one of the most frightful that has ever happened in Europe. The men in charge of the iron curtain between the stage and the auditorium fled without letting it down, thus abandoning the last hope of preventing the conflagration from spreading. It is supposed that most of those unable to escape in the body of the house were quickly suffocated.

Scenes of indescribable misery were enacted during the early part of the fire. Several persons managed to reach the windows in the façade and flung themselves recklessly into the street, breaking their arms and legs. It appears that the fire arose from the falling of a gas lamp, and that the meter did not explode until later. Some 270 bodies have now been recovered, but the fourth gallery has not been reached, and still greater numbers must have perished there, as it is believed that not one person escaped from it, and very few from the third. The remains are all more or less disfigured, only charred fragments being recovered in most cases.

The excitement all through the city is terrible; no one knows what friends may be lost. The loss has fallen mainly on the middle-class portion of the audience, for the stalls and balcony had not filled when the fire broke out, the wealthier class thus escaping.

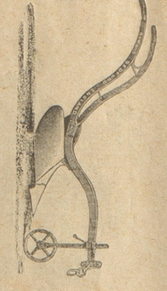
HOWARD'S CELEBRATED PLOUGHS

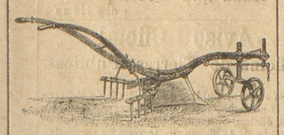
Howard's Small Ridging Plough



A small useful iron plough, fitted with a double mould board or earthing up body, and much used by maize and vegetable growers.

Weight ¾ cwt.

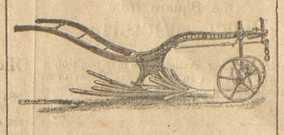
Howard's Water-Furrow Plough



This is a modification of J. & F. Howard's Ridging Plough. It is used for making the water furrows for surface drainage on arable land; the peculiarity of its working is that the earth thrown up on each side of the furrow by the mould boards, is moved away from the edges of the furrow and is harrowed down level with the field, a level surface is thus left for the Reaping Machine, and drainage is facilitated.

With steel breasts, weight 1¼ cwt.

Howard's Potato Ploughs.



With a pair of horses, this implement will raise three to four acres of potatoes in a day; it leaves fewer in the ground than hand digging, and the roots are raised with less bruising or scratching of the skins than by any other method. These Ploughs have stood the test of many years experience, and the demand grows larger annually,

Dr. J. Collis Browne's Chlorodyne

(Ex Army Medical Staff)

IS THE ORIGINAL AND ONLY GENUINE.

CAUTION.—Vice-Chancellor Sir W. P. Wood stated that Dr. J Collis Browne was undoubtedly the inventor of Chlorodyne; that the story of the defendant, Freeman, being the inventor was deliberately untrue, which he regretted had been sworn to. Eminent hospital physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's.—*See Times*, July 12th 1864.

The Public, therefore, are cautioned against using any other than

Dr. J. Collis Browne's Chlorodyne.

REMEDIAL USES AND ACTION.

This invaluable remedy produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body, without creating any of those unpleasant results attending the use of Opium. Old and young may take it at all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while medical men extol its virtues most extensively.

CHLORODYNE is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for coughs, consumption, bronchitis, asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever, Croup, Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery.

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Meningitis, &c.

From Symes & Co., Pharmaceutical Chemists, Medical Hall, Simla, Jan. 6th 1880.—To J. T. Davenport, Esq., 33, Great Russell Street, Bloomsbury, London. "Dear Sir, we embrace this opportunity of congratulating you upon the wide-spread reputation this justly-esteemed medicine, Dr. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleratic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a "deliberate breach of faith on the part of the chemist to prescriber and patient alike." We are, sir, faithfully yours, Symes & Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists."

Extract from the General Board of Health, London, as to its efficacy in Cholera—"So strongly are we convinced of the immense value of this remedy that we cannot too forcibly urge the necessity of adopting it in all cases."

CAUTION—None genuine without the words 'Dr J Collis Browne' on the Government Stamp. Overwhelming medical testimony accompanies each bottle.

AS SURE AS EGGS ARE EGGS.—An American Editor declares that 'out West' eggs are fetching two-pence each, and that the hens do not care about business even at this price. We fancy this must be very far 'West,' or surely our American cousins would ere this have resorted to the use of 'Borwick's Gold Medal Custard Powder,' which renders the housewife perfectly independent of the domestic fowl, since it produces the most delicious custards, blanc-manges, &c, at half the usual cost, and in much less time. The hens had better be 'cautious about 'striking,' or some enterprising storekeeper will introduce this household boon, and ruin their trade for ever. There is no special 'laying season' for 'Borwick's Custard Powder,'—one can keep it always on hand in the neat little packets and tins in which it is sold. Can be had of all Storekeepers in the Colonies.—*Civilian.*
